

# Phishing Awareness Training

CodeAlpha Cyber Security Internship - Task 2

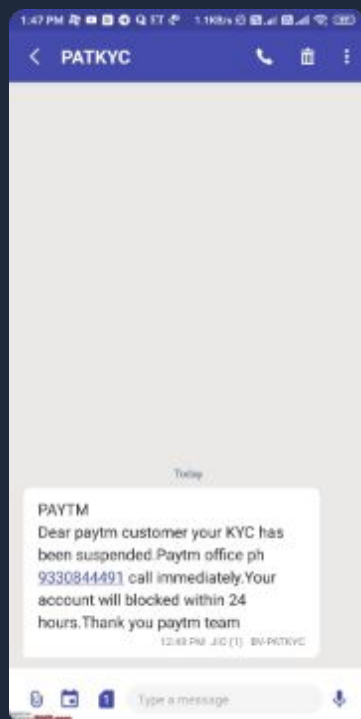

BY MANKA MISHRA

# What is Phishing?

- ▶ Cybercriminals ka **fake email** ya **website** ka use karke aapko bewakoof banane ka tareeka.
- ▶ Inka main goal hota hai aapka sensitive data churana jaise:
  - ▶ Passwords
  - ▶ Bank Account Details
  - ▶ Credit Card Numbers
- ▶ Ye bilkul machli pakadne jaisa hai - vo ek bait (fake link) dalte hain, aur log usme fas jaate hain.

# Real Example 1 - Paytm KYC Scam

Scammers SMS bhejte hain claiming aapka KYC suspend ho gaya hai. SMS mein ek fake link hota hai.

**Fake Link:**

<http://paytmkyc-update.com>

**Real Link:**

<https://paytm.com>

⚠ Notice the missing HTTPS and the weird domain name in the fake link!

# How to Spot Fake URLs

Scammers aisi URLs banate hain jo bilkul asli jaisi lagti hain, bas 1-2 letters ka difference hota hai.

| Real / Safe Link                                                                                                                              | Fake / Phishing Link                                         |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
|  <a href="https://paytm.com">https://paytm.com</a>           |  <a href="http://paytm-kyc.com">http://paytm-kyc.com</a>     |
|  <a href="https://sbi.co.in">https://sbi.co.in</a>           |  <a href="http://sbionline.xyz">http://sbionline.xyz</a>     |
|  <a href="https://icicibank.com">https://icicibank.com</a> |  <a href="http://icici-bank.net">http://icici-bank.net</a> |

# Social Engineering Tricks

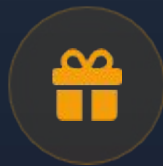

## 1. Urgency

"Dear user, aapka KYC 2 ghante mein band ho jayega.

Abhi update karein."

Creates panic so you don't think.

## 2. Greed

"Congratulations! You won the new iPhone 15. Click here to claim."

Uses greed to make you click fast.

## 3. Fear

"Suspicious login detected! Account hack ho gaya hai, abhi login karo verify karne ke liye."

Scare tactics to get your password.

# 5 Golden Rules to Stay Safe

**Rule 1:** Link pe click karne se pehle URL ko dhyan se check karo.

**Rule 2:** Kisi bhi unknown sender ki email attachment mat kholo.

**Rule 3:** Bank kabhi call par aapse OTP, PIN ya Password nahi maangta.

**Rule 4:** Website link mein hamesha `https://` aur 'lock' icon dekho.

**Rule 5:** Koi doubt ho to link pe click mat karo, direct browser mein official site open karke login karo.

# Quick Quiz - Test Your Knowledge

## Question 1

Kya ye link safe hai?

`www.amaz0n.in`

**No, Safe nahi hai!**

Dhyan se dekho, spelling mein alphabet 'o' ki jagah number zero '0' ka use kiya gaya hai. Ye ek fake site hai.

## Question 2

Agar bank ka official bol kar koi OTP maang raha hai phone pe. Kya karein?

**Call cut kar do!**

Bank kabhi aapse OTP nahi maangta. Ye fraud call hai, turant number block karein aur report karein.

# Stay Safe Online!

Thank you for attending the Phishing Awareness Training.
